## Project 2 - Part 3

Find any three websites you like. Look for an "effect" on each that you would like to copy. Write the code to accomplish the same/similar effect on your own webpage. (You may need to ask questions in class, or look up tutorials online.)

1. What was the first webpage, and effect?

2. How did you accomplish the effect?

3. What was the second webpage, and effect?

4. How did you accomplish the effect?

5. What was the third webpage, and effect?

6. How did you accomplish the effect?
