Project 2 - Part 1

1. What is a CSS selector?

2. What does the following CSS do:

```
header img {  
    height: 2em;  
}
```

3. Explain the CSS psudeo-class :hover

4. What does the following CSS do:

```
a {  
    color: lime;  
    text-decoration: none;  
}  
  
a:hover {  
    text-decoration: underline;  
}
```

5. Explain the CSS psudeo-class `:active`

6. Write code that makes the text color of a paragraph(s) change when you click on it.

7. What are "IDs", and what are "classes" on a webpage? How are they different? How are they the similar?

8. Write an example of code (both HTML and CSS) that makes use an ID.

9. Write an example of code (both HTML and CSS) that makes use a class.
