Project 1 - Part 4

All of these question pertain to your website you are creating for Poject 1.

1. Give a brief description of your website. What is the theme?

2. Are there any images on your website? Why or why not?

3. Are there any hyperlinks on your website? Why or why not?

4. How are you using CSS on your website?

5. What steps did you (or could you) take to "polish" your website? (In other words, how did you make the website look clean, consistant, intentional, etc.)

6. Does your website have more then one page? Why or why not? If not, would it make sense to add more pages in a future update? What would the new pages be, or why only one page?

7. How are the files (code, images, etc.) in your website organized? Is everything in one folder, or did you use subfolders. Why or why not? Does you site have an `index.html` page? Why or why not?
